

The global output in dermatology research is growing, and Wiley publishes more research than anyone else in the market

Wiley dermatology resources cover the anatomy, physiology, and pathology of the skin, as well as:

- Investigative and experimental dermatology
- Contact dermatitis
- Dermatologic surgery
- Dermatologic pathology
- Dermatologic oncology

The category also includes specific resources on burns, wounds, and leprosy

While open access growth in dermatology is not yet as robust as in other health science disciplines, it is accelerating

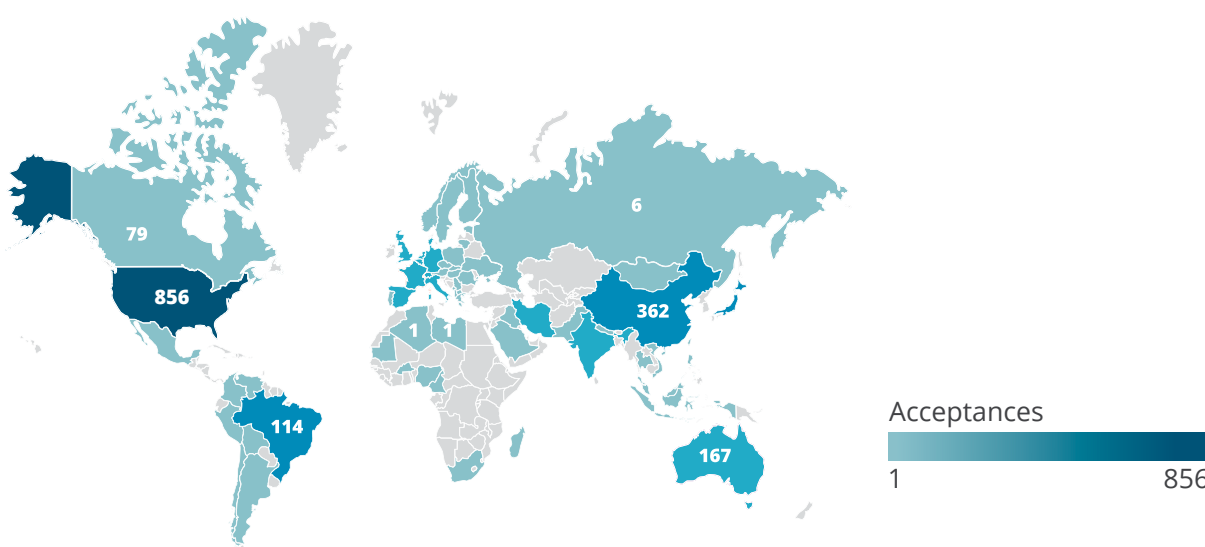

48%

We publish 48% of articles in the ISI Dermatology category, and give readers broad coverage of the latest research from around the world by publishing:

Overall, 40% of the global output comes from these regions:

Dermatology
